

At the beginning of this term, I went to GAGAL to learn about mathematics by building things.

You learn lots from GAGAL. It is important to listen to Mr Hermann. If you don't, he will wait until you stop. I like building stuff like the tow truck, the Planter Box and a trinket Box.

In the beginning, we learned a lot about measurement.

The Planter Box is quite hard sometimes but it gets easier. For the Planter Box we used: 8 slats, 4 Legs, 1 piece at the bottom. We glued and nailed to put it together.

It is fun going to GAGAL. My reason - we get to build a planter box.

**GAGAL ROCKS!**
